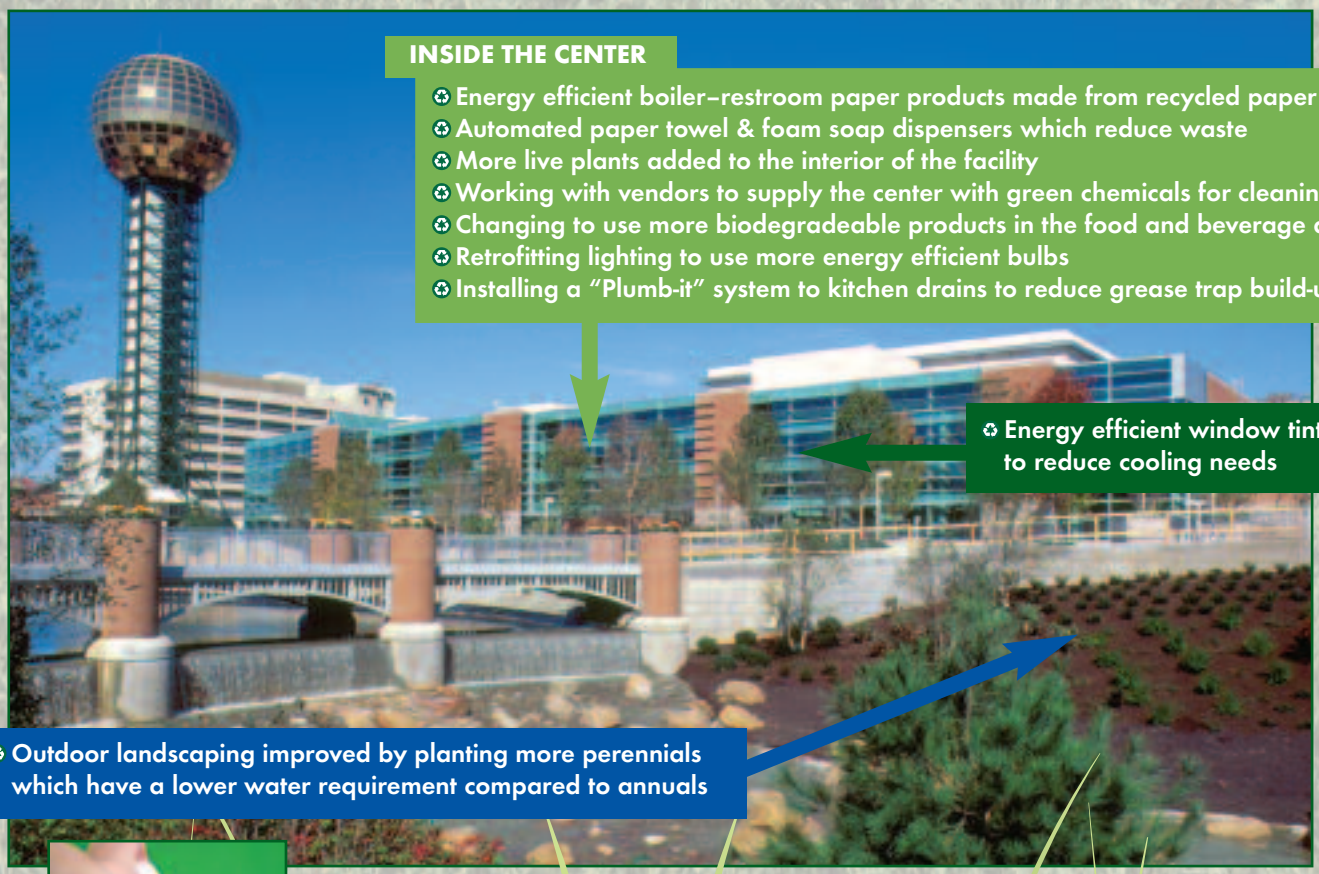
Green on the Inside & Out!

Giving the Knoxville Convention Center a Spring Greening



INSIDE THE CENTER

- Energy efficient boiler–restroom paper products made from recycled paper
- Automated paper towel & foam soap dispensers which reduce waste
- More live plants added to the interior of the facility
- Working with vendors to supply the center with green chemicals for cleaning
- Changing to use more biodegradeable products in the food and beverage department
- Retrofitting lighting to use more energy efficient bulbs
- Installing a "Plumb-it" system to kitchen drains to reduce grease trap build-up

- Energy efficient window tinting to reduce cooling needs

- Outdoor landscaping improved by planting more perennials which have a lower water requirement compared to annuals

- Recycle bins located throughout the center for guest and employee use.
- Recycling program includes aluminum and steel cans, glass, plastic and mixed paper.

- In 2007, 18,342 lbs. (since opening in 2003 94,579 lbs) of un-served food has been donated to Second Harvest Food Bank.
